

FETAL GROWTH & DEVELOPMENT

During the time from conception to birth, a microscopic single cell evolves with rapid speed into a fully formed infant, weighing on average, around seven pounds at birth.

So, what is it that makes a difference? It's time and a place to grow.

Science and technology have allowed us to see this process:

Weeks 1 to 2 – <https://www.ehd.org/mp4/0727.mp4>

Weeks 3 to 4 – <https://www.ehd.org/mp4/1219.mp4>

Weeks 4 to 6 – <https://www.ehd.org/mp4/1341.mp4>

Weeks 6 to 8 – <https://www.ehd.org/mp4/1748.mp4>

Weeks 8 to 10 – <https://www.ehd.org/mp4/2248.mp4>

More Weeks:

See The Biology of Human Development – https://www.ehd.org/science_main.php

Instructions: Open above link. Find "Go to Weeks:" section located about 1/3 of the way down the page. Open the section that matches the week gestation of your pregnancy, e.g. 5-6, 6-7, etc. Find "Play Movie" or "See Snapshots," open.
